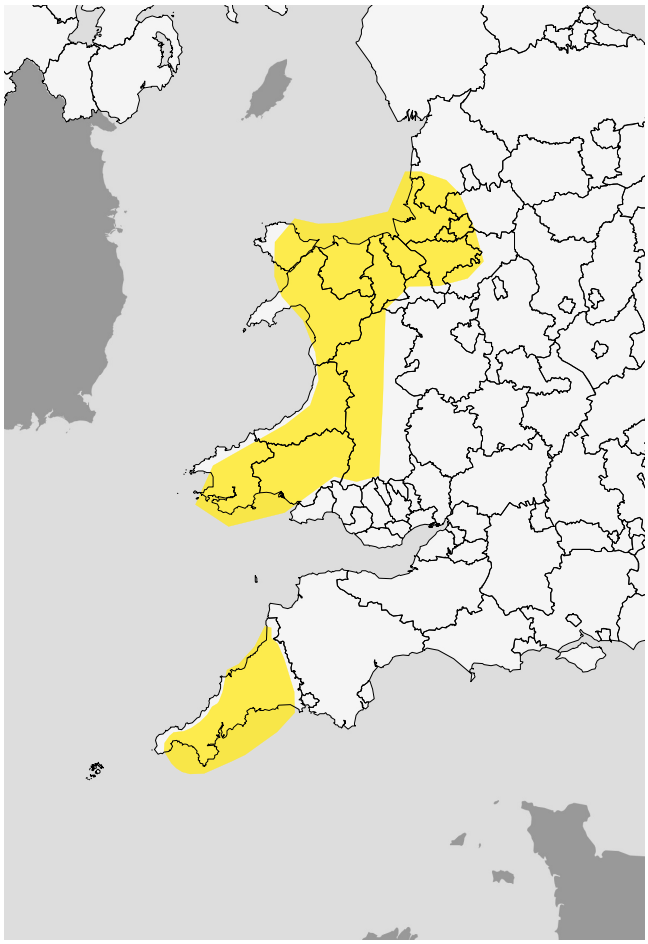
Snow & Ice

Between
03:00 Thu 9 Jan 2025 and
12:00 Thu 9 Jan 2025



Snow and icy patches leading to some travel disruption.

What to expect

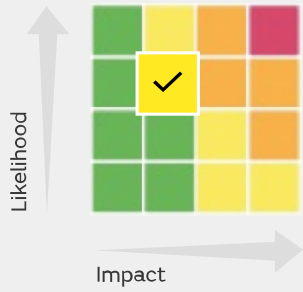
- Some roads and railways likely to be affected with longer journey times by road, bus and train services
- Some injuries from slips and falls on icy surfaces
- Probably some icy patches on some untreated roads, pavements and cycle paths

Further details

Showers, mostly of rain and sleet at low levels and near coasts, but of snow inland and over higher ground, are expected to affect the area later Wednesday night and on Thursday morning. With many surfaces below freezing, this will lead to some icy stretches on untreated surfaces, while a few cm of fresh snow could affect some areas, mainly places above about 100 metres.

What should I do?

Snowy, wintry weather can cause delays and make driving conditions dangerous.



Medium likelihood of low impacts
